Publication No. US20040034888A1

GENERAL INFORMATION:

APPLICANT: Liu, Jingdong

APPLICANT: Screen, Screen E

APPLICANT: Tabaska, Jack E

APPLICANT: Cao, Yongwei

TILLE OF INVENTION: Nucleic Acid Molecules and Other Molecules Associated With

TILLE OF INVENTION: Plants and Uses Thereof for Plant Improvement

TILLE OF INVENTION Plants and Uses Thereof for Plant Improvement

CURRENT PAPLICANT: 2003-04-28

CURRENT PILING DATE: 2003-04-28

NUMBER OF SEQ ID NOS: 73128

Sequence 32, Application US/09858664A

Patent No. US2002072491A1

GENERAL INFORMATION:
GENERAL INFORMATION:
TITLE OF INVENTION: ISOLATED HUMAN KINASE PROTEINS, NUCLEIC
TITLE OF INVENTION: ACID MOLECULES ENCODING HUMAN KINASE PROTEINS, AND USES
TITLE OF INVENTION: THEREOF
TITLE OF INVENTION: ACID MOLECULES ENCODING HUMAN KINASE PROTEINS, AND USES
TITLE REFERENCE: CL000927-CIP
CURRENT APPLICATION NUMBER: US/09/858,664A

CURRENT FILING DATE: 2001-05-17
PRIOR FILING DATE: 2000-11-11
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Gaps

Sequence 245645, Application US/10424599

Sequence 245645, Application US/10424599

Publication No. US20040031072A1

GENERAL INFORMATION:

APPLICANT: La Rosa Thomas J

APPLICANT: Zhou Yihua

APPLICANT: Cao Yongwei

TITLE OF INVENTION: Soy Nucleic Acid Molecules and Other Molecules Associated With

TITLE OF INVENTION: Plants and Uses Thereof for Plant Improvement

TITLE OF INVENTION NUMBER: US/10/424,599

CURRENT FILING DATE: 2003-04-28

NUMBER OF SEQ ID NOS: 285684

SEQ ID NO 245645

LENGTH: 84
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            OTHER INFORMATION: MAP TO ACO11456.2
